intuit
QuickBooks

QuickBooks is an accounting software that helps you track your business's income and expenses, create estimates and invoices, and sync your bank accounts.

HERE'S HOW IT WORKS:

Export your RICS data to QuickBooks and gain insight into what's going on in your business. You can use this function to get your financial information out of RICS and into QuickBooks.

QUICKBOOKS ONLINE

With this version, you simply enter your QuickBooks account information into RICS and send your data over to QuickBooks.

QUICKBOOKS DESKTOP

For the desktop version, RICS will create an export file that you can import to QuickBooks.

Once RICS is set up with Quickbooks, you can export all of your financial data, including different types of transaction, coupons, and payment methods. There is no additional charge for integrating RICS with Quickbooks, so take advantage of it and help your business grow!

RICS AND QUICKBOOKS CAN HELP YOU RUN YOUR BUSINESS

Using RICS and QuickBooks allows you to easily access your data and use it to its full potential so your business can succeed.

Thinking about switching to RICS and using QuickBooks?

Email sales@ricssoftware.com or call 800-654-3123.

Already a RICS client and want to know more about QuickBooks?

HERE'S WHAT CLIENTS ARE SAYING:

“Halloween Express receives countless inquiries about credit card processing from companies across the country. After a thorough review of proposals, we've decided to partner with Infintech. Infintech has a stellar reputation in the industry, familiarity with both RICS Software and SlimCD, and is committed to delivering the lowest pricing for our store owners.”
